

Consultancy Services

Below is a variety of consultancy areas that are available to our TotalFinance and TotalRepairs customers. By utilising this consultancy you will receive the assistance of our Services team, who will help you implement and make the most of any project that your organisation would like to undertake. Read below to see which consultancy area may specifically appeal to you.

Systems/Module Review

- A full review of your current system
- Receive a document detailing suggested system or procedural changes, along with features and modules, which may benefit you

Advanced Purchase of Consultancy Days

Pre-arranged scheduled visits by Consilium Consultants which:

- Allow the continued implementation of Total and helps enable features which you may not have had time to progress
- Help customer to fully understand the relevance of changes within each Total release and how they can be used to their benefit

SQL Reporting

- Define SQL reports with each report set up with an individual menu option
- Add simple parameters to reports to enable users to enter selection criteria when running reports
- In-built forms designer allows forms to be displayed on screen, exported to a spreadsheet or output to a printer
- Reports can be scheduled to run automatically

Update on Scheduling Capabilities

Automate each of the following:

- TASKTALK interfaces (both imports and exports)
- Financial batch updates (stock transactions, journals, creditor transactions etc.)
- Works Order Management (WOM) to Labour Costing Completion Data
- At-Cost invoicing process
- Accruals and Commitment updates

WOM to Labour Costing Update Management

- Schedule the update of job completion details, from works ordering to labour costing timesheets, to run out of hours
- Prevents the routine from conflicting with other user activities
