

Pinpoint, document and report incidents and alert the right people with...

...TotalMobile Incidents

TotalMobile Incidents is a reporting application allowing remote workers to pinpoint, document and submit actionable occurrences (such as abandoned vehicles, vandalism, graffiti etc) into corporate management systems - enabling organisations to react instantly.

Features

- Real-time reporting of incidents requiring attention
- Integrates with existing back-office systems such as CRM
- Imaging and GPS location features integrate with existing GIS systems
- Issue work orders to departments or individual workers
- Works as an independent application or within other **TotalMobile** applications for enhanced functionality i.e. specify the materials and equipment needed to tackle incidents with JobBuilder

Benefits

- Document and process incidents quicker
- Alert the appropriate people to take immediate action
- Date and location stamped images pinpoint incidents and help resolve disputes and queries
- Saves time and paperwork
- Removes need for additional staff travel to report incidents

TotalMobile Incidents runs on Windows Mobile™ devices and complements your existing IT infrastructure through seamless integration with back office systems and databases.
