

Identify and detail work for completion while in the field with...

...TotalMobile JobBuilder

TotalMobile JobBuilder is a work creation application that allows remote workers to document additional job-related tasks for completion, detail their scope and specify the tools and equipment required.

Features

- Allows workers/inspectors/engineers to identify and report future job requirements while at the scene
- Create detailed job information i.e. list equipment, schedule times, locations, specify measurements and much more
- Create templates for documenting work faster
- Works in conjunction with other **TotalMobile** applications for enhanced functionality i.e. use with Job Management and Visits to plan and organise work-surveys with

Benefits

- Provide a faster service by reporting and assigning jobs quicker
- Save paper and administration time by submitting jobs directly into corporate systems
- Prepare workers with all the information they need to complete jobs in one visit, saving money and time

TotalMobile JobBuilder runs on Windows Mobile™ devices and complements your existing IT infrastructure through seamless integration with back office systems and databases.
