

**Complete and submit worker timesheets automatically with...**

## **...TotalMobile TimeSheets**

**TotalMobile Timesheets** are a mobile 'punch-card' application that automatically records and documents employee work and productivity seamlessly while allowing workers to focus on the job at hand.

### **Features**

- Allows workers to manually record their productive time
- Background mode automatically records time while working
- Ensure timesheets are completed correctly with regular reminders
- Can keep jobs on track by notifying of job overruns
- Customisable 'Time Types' to suit any workflow
- Submit periodical updates to corporate systems
- Works as an independent application or in conjunction with other **TotalMobile** applications for enhanced functionality i.e. automatic completion with Job Management and Visits

### **Benefits**

- Eliminates staff travelling to the office to submit timesheets
- Saves time and money by reducing administrative paperwork
- Empower management by providing accurate and up to the minute information
- Can be integrated to most Payroll systems for quick and accurate salary calculations

**TotalMobile TimeSheets** runs on Windows Mobile™ devices and compliments your existing IT infrastructure through seamless integration with back office systems and databases.
