

Keep your stock at optimum levels with...

...Stores

TotalRepairs Stores module is a comprehensive stock management system that reduces inventory and storage space maintaining stock and cash flow efficiently.

Features

- Consistently maintain the most efficient stock levels in multiple locations
- Works with **TotalMobile** to automate the re-stocking of vans in real time as operatives use materials
- Deliver accurate costing data with direct integration with the TotalRepairs costing ledger
- Seamlessly link with Purchase Order Processing within TotalRepairs
- Accurate and precise stocktaking control for the immediate highlighting of loss or discrepancies

Benefits

- Optimise inventory to keep your working capital in your business, not on your shelves
- Automate restocking levels with **TotalAlerts**, freeing your staff to focus on more strategic tasks such as researching more economical suppliers
- Speed up the restocking of your vans with **TotalMobile** and **Stores**
 - keep your operatives on completing more jobs, first time
