

## Meeting the needs of 21st century Finance Departments...

## ...TotalFinance

**TotalFinance** is a complete Operational & Financial Management solution that provides both financial and non-financial information for large commercial organisations and local government agencies. TotalFinance builds on a wealth of technology to deliver sophisticated functionality in an innovative and user-friendly format.

### *Features*

- Total back office
- TotalView
- Alerts
- Interfacing and integration
- Supports Government
- Built on modern technology architecture
- Industry standard operating systems and databases (Unix or Windows platform with a choice of Oracle or Microsoft SQL database)
- Allows for a range of deployment configurations (client /server, thin client and ASP off-site hosted model)

### *Benefits*

- Delivers relevant, accurate and timely information on a regular and ad-hoc basis
- TotalView allows organisations to devolve their processes to users across the enterprise while retaining process control
- Alerts to notify users of key events that require attention
- Interfacing and integration is simplified into 4 levels
- In line with the eGIF guidelines integration is performed using XML
- The ASP off-site model eliminates the need for upfront hardware investment
- Lower cost of ownership and reduced operations risk
