

## Control employee Wages, Tax, NI and Superannuation with...

# ...TotalFinance Payroll

The **Payroll** is a totally integrated module that is designed to meet current legislative requirements in respect of Tax, National Insurance and HMRC returns. It also provides accurate labour costing analysis as part of the payment process.

### *Features*

- Unlimited user defined payroll types to reflect pay periods i.e. weekly, fortnightly, monthly and annually
- Full control over user access
- Unlimited user defined 'Pay Elements' to cater for the calculation of pay
- Calculates Pay, Tax, National Insurance and pension contributions
- Handles Special Payment's including payments to HMRC, Unions and pension schemes etc.
- Holds employee standard payments and deductions for each pay period and cumulative values for the current year and up to 6 previous years
- Holds unlimited period balances for each pay element code
- Caters for BACS and Cheque payments to employees and 3rd parties
- Payments/deductions can be input in multiple forms and imported from other sources
- Payments can be charged to specific General Ledger codes or Costing Ledger codes
- Provides detailed and accurate labour costing analysis
- Integrates to Cash Book module

### *Benefits*

- Provides up to date labour costing analysis information e.g. against budgets in General Ledger and against projects / contracts within Costing Ledger
- Easy access to payroll data for previous years enables P60's to be reproduced after year end if required
- Seamless integration to HMRC gateway for in-year end of year statutory reports
