

On demand information and online processing with...

...TotalView

The **TotalView** portal provides a web based environment for accessing applications and content within a secure environment. TotalView adds an exciting dimension to TotalFinance with portlet based workflow capability and the ability for each user to configure their own personalised dashboard of information containing links to applications, performance indicators and content with drill down capability. This capability allows councils to devolve their processes to users across the enterprise while retaining process control. This will result in more efficient processes overall.

Features
