

Link your staff with the information they need with...

...TotalView

TotalAlerts gives users a real time view of corporate information through one user friendly portal. It can summarise work needing completion, alert managers to problems and can be integrated with external applications such as your housing management system to collect crucial information.

Features

- Designed to access information from any SQL Server database
- Provides a digital dashboard to the users requirements
- Has the capability of providing visual indicators by way of traffic lights
- Includes as standard graphical portlets to display key information in various graphical formats
- Incorporates Crystal Viewer capability that allows Crystal Reports to be distributed with no additional Crystal licence costs

Benefits

- Provides a one-stop portal for all business information
- Cost effective distribution of reporting
- Provides proactive reporting to managers to assist them with day to day business decisions.
- Be proactive and not reactive with a TotalView of your business
